

TIAGO LUIZ SEUACIUC DE POLI

Senior Backend & Cloud Engineer | Node.js • TypeScript • .NET • AWS • AI Workflows

📍 São Paulo, Brazil | ✉️ tiago.seuaciuc@gmail.com | ☎️ +55 (11) 95206-6489 | 🔗 @tiagoluizpoli

PROFESSIONAL SUMMARY

Senior Backend Engineer specialized in **cloud-native architectures, distributed systems, and AI-powered workflows** using **Node.js, TypeScript, and .NET**. Experienced in designing **multi-tenant SaaS platforms**, microservices, authentication/authorization systems, identity validation flows, document intelligence pipelines, and high-throughput data processing workflows. Skilled in **Terraform, CI/CD, AWS, Azure AI, OpenAI APIs, Clean Architecture, and SOLID principles**. I deliver scalable, secure, and maintainable applications end-to-end — from architecture to deployment — with strong ownership and high engineering standards.

PROFESSIONAL EXPERIENCE

Senior Software Engineer – TIVIT

Apr 2023 – Present | São Paulo, Brazil (Remote)

Tech stack: Node.js (TypeScript), .NET Core, AWS, Azure Document Intelligence, OpenAI, Terraform, CI/CD, Cognito

- **Designed and maintained a multi-tenant SaaS platform** focused on identity validation, background checks, liveness detection, facial recognition, and document analysis, using **Node.js, .NET, and AWS**.
 - **Built a custom authentication and multi-tenancy service**, extending Amazon Cognito with dynamic tenant routing and identity workflow logic.
 - **Implemented AI-driven document parsing workflows** using **Azure Document Intelligence + Amazon Textract**, reducing manual validation effort and accelerating onboarding processes.
 - **Integrated Generative AI features** using **OpenAI and Azure OpenAI**, enabling automated data extraction, text generation, and intelligence across product flows.
 - **Delivered face recognition and liveness detection pipelines**, cross-referencing biometrics with ID data to increase fraud prevention accuracy.
 - **Led infrastructure design and deployment** using **Terraform, CI/CD pipelines**, and containerized services.
 - **Redesigned the entire SaaS architecture** to run within TIVIT's internal infrastructure following **Clean Architecture, SOLID, Design Patterns, and Clean Code**.
-

Full Stack Engineer – Kronus Tecnologia

Jan 2022 – Sep 2025 | Remote

Tech stack: React.js, Node.js (TypeScript), Firebase, DigitalOcean

- **Developed end-to-end web solutions** for small businesses, from UI design to backend services and cloud deployments.
 - **Integrated credit checking workflows** with financial partners, enabling automated verification of credit scores and background checks.
 - **Delivered lightweight, scalable applications** optimized for cost, performance, and maintainability.
 - **Owned the full development lifecycle**, from idea validation to continuous delivery and support.
-

Full Stack Engineer – Mobdec (Augmented Reality)

Feb 2022 – Mar 2023 | Remote

Tech stack: .NET 6, Node.js (TypeScript), React.js, PostgreSQL, MUI, AWS, GPU-enabled VPS

- **Built backend services and internal portals** using **.NET 6 with Clean Architecture**, powering AR mobile and web applications.
 - **Designed a complex 3D file conversion pipeline** for .skp models, combining queues, GPU-enabled VPS servers, and Ruby scripts to automate GUI interactions and multi-format conversion.
 - **Integrated Pagar.me payments** and implemented the entire payment workflow.
 - **Improved platform reliability** through better service orchestration and optimized cloud architecture.
-

Desktop Software Developer – Freelance

2016 – 2022 | Remote

Tech stack: C# (WinForms), SQL Server, MySQL, SQLite, PostgreSQL, Selenium, Excel Interop

- **Developed multiple custom desktop applications**, including time tracking systems, digital product management tools, karaoke applications, and sales report generators.
 - **Built automation scripts** to eliminate repetitive manual data entry using **Selenium, Excel interop, and REST API enrichments**, improving operational efficiency for small businesses.
 - **Delivered robust CRUD systems** with advanced filtering, import/export capabilities, and reporting dashboards.
-

EDUCATION

Associate Degree – Systems Analysis and Development

UNIASSELVI – 2024–2026

LANGUAGES

- English — Full Professional Proficiency
 - Portuguese — Native
-

TECHNICAL SKILLS

Backend & Cloud

Node.js (TypeScript), .NET Core, C#, API REST, AWS (Lambda, S3, SQS, ECS, RDS, EC2, Cognito), Azure AI, Terraform, Docker, Kubernetes, RabbitMQ, Prisma, Drizzle ORM, PostgreSQL, MySQL, SQL Server, DynamoDB

AI & Automation

OpenAI API, Azure Document Intelligence, Amazon Textract, AWS Rekognition, Data Extraction Pipelines, Intelligent Automation

Frontend

React.js, TypeScript, MUI, Tanstack Query, Vite, Bootstrap

Architecture & Engineering Practices

Microservices, Multi-Tenant SaaS, Event-Driven Systems, Clean Architecture, SOLID, Design Patterns, CI/CD, Cloud-native development
